The news from Kentucky, as sent us by our agents and special correspondents by telegraph, will be found on our local page after the returns from the city of ouisville. They are thus arranged for the better convenience of the reader.

TENNESSEE.

NASHVILLE, Nov. 3.- Returns from all sections of the State, except East Tensessee, indicate that the Democrats have made even larger gains than they anticipated. This is particularly the case in the more populous counties in Middle and West Tennessee, where the negro vote in the last Gubernatorial race was cast solid for the radical ticket. It is, however, at present, impossible to state the actual sult, but Grant's majority will probably reach 30,060, against Brownlow's 52,000

MASSACHUSETTS:

New York, Nov 3.—Dispatches from Bostou and Hartford show that Grant has made very heavy gains thus far. Private telegrams from General Butler's district state that, judging from the voting thus far, he will selected by a large majority. A dispatch from Boston asye Grant gains heavily all over the State. His majority will probably be about 75,000.

Boston, Nov. 3.—In this State Grant has made heavy gains over the Republican vote of last year, and hie majority will probably be in the neighborhood of 75,000. Every city gives large Republican majorities. Boston gives between 3,000 and 4,000 Chelsea 1,150, New Badford 1,200. Cambridge about 1,000, and Charlestown about 700 or 800. Hooper, Republican, for Congress, has over 2,500 majority; Twitchell, Republican, in Third District, has about 2,000 majority.

In the Fifth District Gen. Butler has a large majority in every city and town heard from, and his total majority must largely exceed that of last election. Butles and loutwell are elected by very large mejorities. The vote for Adams for Governor shows a heavy decrease from last election.

1007 THE CHANNEL 1-TO BE CROSSED.

All the information we possess respecting the acundings of the ocean ecross the English channel, indicate the existence of a flat bottomed soil, rising gradually on the side of England, nearly even on the side of France, and easily to be leveled at both extremities by wrone pillars. All the Lis to be donn is, then, to lay two estes of rails at the bottom of the scen and to cover and to protect them in such a manner as not be disturbed by water.

To this end Cornhili proposes to mannuscure a double large iron submarine tune, flat at the bottom and containing two sets of rails.

Comparison with the Last Gubernatorial and Presidential Elections.

> Partial Returns from Jefferson and Other Counties.

> Large Vote Polled Everywhere.

There was no undne excitement over the election in Louisville yesterday. In-deed, it was remarked by every one that t was the most orderly election ever held in Lonisville. Both parties worked ear-nestly and noflaggingly, as the very large vote cast indicates. It will be seen that the whole vote was 10,270, of which Seyour and Blair received 8,819 and Grant and Colfax 1,421, a majority of 7,42- for the national Democratic ticket. For Cou-gress, Hon. Boyd Winchester received 8,-585 votes and Judgs English 1,214, a ma-jority of 7,371 for Mr. Winchester. For the State Seuate, Dr. E. D. Standiford had no opposition. His vote in the First Colfax, 12 against 1. and Second wards, which comprise the city portion of the Senatorial District, was From our comparative table suboined we make the following recapitulaon of the city vote yesterday, at the Gub-natorial election in Angust last, and at

Presidential election in November,

This shows a Democratic gain of 590 otes since Angust and of 3,863 since the election in 1864. It exhibits a decrease in the radical vote of 521 since the last Presidential election, and a gain of 928 since the Angust election, but the ang-mented vote of the Democracy makes the actual radical gain only 338 since Au-gust. Col. Prentice has no doubt, that, among the hundred thousand inhabitants of Louisville, there are full "four or five" who are capabla of making such a statement as tha New Albany Commercial published. And he thinks, that the New Albany editor, when associating with citizens of Louisville, must have an untorturate aptness for getting into the wrong set.

Colonel P, begs that the "four or five citizens of Louisville" will take to themselves the language of his card in the Journal of Monday morning.

Mr. Theo. Erown called attention to the article in the constitution requiring four weeks' notice of any motion to alter that institution, and moved that the ravisal of the constitution be taken up this day four weeks instead of Saturday next, the 7th proximo. He entered bri 19 into the history of this untortunate instrument which, though in print, has never yet found its place upon the records or on the files of the club. It was hastly gotton up by the committee appointed for the purpose last year, without consultation or due deliberation, and in the ebsence of a majority of the members. It is, therefore, crude and III digested in arrai genent and very detective in composition; as a member of that committee he was, therefore, glad of an opportunity of revisal.

one of the power indicated at \$5,000, but I may be under the mark now. The true (nestion, however, is not how many doi lars the machine will cost, but how much can it save or earn. Then It is not always the cheepest machine that is found to the most morthable. Suppose the machins cost \$5,000. This appears indeed to he a large sum, but from all the data I can gather, such a machins could not make less than \$5,000 (Lesr money in four months, plowing and seeding land by the acrs. Now, 100 per cent in four months isn't bad. It the machine was to cost \$10,000, it would be a good deal better than five-tweutles or tenforties. It might be worthy the attention of our street naurers.

An objection often made to steam plows is that they are not adapted to small farmers. This objection certainly aplears to be a valid one. A man who has only forty acres to plow and seed would lears to be a valid one. A man who has only forly acres to plow and seed would want it ouly a day or so. But he might jein with some other small farmers and buy one, and go art oud plowing and seeding for the large farmers around hint and make a good deal more than hy working on his small farm. And I have no doubt that this will be the way in which the first steam plows wilt come into use, as men buy these expensive grain separators and go around cleaning other people's grain by the husbel. Were I en gaged in manufacturing these machines, I would much prefer using them this way to selling them.

Another objection to seny machine of

wheele, as well as likebind wheele, should be short wheele, as well as likebind wheele, should be short of the club. He was afraid the ground should pull. This I have devised to you high the engineer at will may throw it gar it is to roward wheels. This means the same may be said of another arrangement equally important, as will appear.

There is a very important well known rule in mechanics by which force is gained by reducing speed, and vice very mechanic of use, and we take a load as heavy as an war can readily inove over an ordinary level road, say three miles an hour. We come to an individual the short of the club, with practical application to the cannot be a surfaced to the club, with practical application to the cannot be comed to the club, with practical application to the club, with th

cerning a suspicioue craft upon the Ohk and those who manned her: Since the discovery of a boat in the vi-cinity of Warsaw, some few weeks ago, which was found to be laded with eolen goods, picked up here and there along the Ohlo river, the officere have been on the alert to see that no such craft should pass by the city—in the day time at least. In view of this fact there was arraigned before the Potice Court yesterday two men named William and Joseph Francis and a woman named Bertha Francis. According to the evidence adduced by Ufficer Tealon, there is something auspiciona in their conduct. That officer states that between one and two o'clock yesterday morning, in the Seventeenth Ward, he noticed a skiff containing taking them to the etation-house thera was found upon the peranns of the men a bowle knite, a butcher-knife, and a pietol, and a complete set of burglar's tools. They were held for a further examination on the 6th, being raquitwd to anterinto bonds of \$300 each for their appearance on that day in default of which they were committed.
